RE: Case 14-M-0101, Reforming the Energy Vision  
Case 15-M-0252, Utility Energy Efficiency Programs

Dear Secretary Burgess,

This letter is to express the Consumer Power Advocates' support of the request by New York City's to extend the following deadlines:

Document	Former Date	Proposed Date
Utility Draft Energy Efficiency Transition Implementation and Budget and Metrics Plans	September 21, 2015	September 28, 2015

Staff White Paper on Ratemaking  
And Utility Business Models

Initial Comments	October 5, 2015	October 26, 2015
Reply Comments	November 2, 2015	November 23, 2015

As the City notes, there are a large number of documents concerning complicated issues of great importance to our members. These issues require careful consideration, and the burden of meeting these deadlines is particularly difficult for parties which do not have the large resources

available to government agencies or the utilities. Nevertheless, we continue to believe that consumer input is essential to successful completion of the REV process. For that reason, CPA supports the City's request for extension of the above deadlines.

Thank you for your consideration.

Respectfully Submitted,

***John J. Dowling***
